Subscribers on the Microwave Journal® Mailing List are design engineers, project managers and executives with key decision-making power. These industry experts are directly involved in their firms' specifications and purchasing plans for a variety of products. They rely on Microwave Journal® to get the best technical research and development news about wireless productivity and wave frequency. They work in both the commercial and government sectors - industries varying from radar and communications to automotive and security products. Subscribers are also computer-aided design analyzers who design amplifiers, oscillators and other components that make up cell phones, play stations and other useful handheld electronics.

The average Microwave Journal® reader influences \$312,010 worth of purchases per year while 16% of them influence more than \$500,000 worth of purchases per year.

94% of Microwave Journal® readers are degreed professionals involved in the engineering - management, R&D, design application, purchasing, production, education and marketing of microwave electronics.

Published monthly and peer-reviewed by an experienced microwave design engineering/editorial team before publication, Microwave Journal® provides depth and detail found nowhere else. Because content is developed with working professionals in mind, subscribers can depend on Microwave Journal® to keep them up-to-date with critical information about the technology, players and day-to-day issues.

Edith Roman recommends the Microwave Journal® Mailing List for a variety of offers including associations, office products, CAD software, lab equipment, seminars, catalogs, courses, and more.
